COMPANY

⦿ **K. MITSIOPOULOS – V. MEGALOOIKONOMOU Co was founded in 2006.**

⦿ **The main activity of the company is the production and distribution of sealing and thermal protection materials for marine and industrial applications.**

⦿ **Our Company Policy sets Quality as our first priority.**

All our materials are certified and can always be technically supported by the necessary documentation.

⦿ **Our Technical Department consists of experienced technicians, always willing to provide the best feasible solution for every situation presented by the customer.**

⦿ **Our Sales Department handles each request directly and immediately, satisfying the most demanding customers and needs.**

SOLUTIONS FOR MARINE INDUSTRY

Manhole Gaskets

Soft Fiber Gaskets

Spiral Wound Gaskets

Gasket Sheets

Gasket Cutting

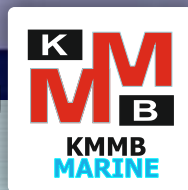

www.kmmb.gr

KMMB was one of the first companies having a cutting machine in Greece, in 2007.

Numerous years of experience have made us the most reliable partner in sealing applications and gasketing.

On our ATOM FlachCut CNC machine we cut gaskets of all shapes and sizes, out of rubber sheets, gasket sheets, graphite sheets, PTFE or any other soft material.

Sealing Gaskets

We specialize in manufacturing sealing gaskets made of different types of Sealing Material. (Aramid Fibers, Graphite, Silicone, PTFE, etc.)

We cut Gaskets in any standard size, or given dimensions and designs by our clients.

Our technical department is always available to give the best solution to any sealing application.

Plate Heat Exchangers Gaskets

⦿ To prevent leaking, a fine elastomer is installed around the plates and big tightening bolts are used to put the plates together. Most popular materials used are: NBR, HNBR, EPDM, FPM (different grades).

⦿ We offer Gaskets suitable for all the world-known brands that produce Heat Exchangers.

K-Graf[®] Reinforced Graphite Sheets & Gaskets

K-Graf[®] Reinforced Graphite Sheets provide great chemical resistance, high elasticity and thermal stability.

Depending on the application either tanged, plain or no metal insert could be recommended.

Packings

NATURAL FIBERS Packing

Gland packing braided by cotton yarn, impregnated with mineral products with excellent lubricant properties. This packing is used as a seal for industrial, potable, waste, or sea water, and for dry industrial or inert gasses.

TANK LID Packing

This packing is a combination of elastic rubber core which is tightly protected by PTFE tape braided by inert and strong synthetic fiber.

It is a specially designed and unique seal for the lids of containers, tanks, manholes, etc

PTFE Packing

This packing is used for sealing of plungers and centrifugal pumps and valves. It may be used for sealing in a broad nomenclature of chemical aggressive environments, as well as in water and steam up to 200°C

GRAPHITE Packing

This packing is used for sealing a range of chemical mediums in plungers and centrifugal pumps and valves. It is appropriate for very high temperatures (650°C) and for high pressured environments

Component Mechanical Seals

We can provide a wide range of component Mechanical Seals made of different materials and in various formats.

Therefore they can be used in many different environments and resist to a range of temperatures and chemical media.

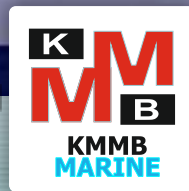

Rubber Sheets

There is a wide variety of different types:

- SBR
- NBR
- EPDM
- VITON
- NEOPRENE
- SILICONE
- HYPALON etc.

We constantly have on stock rolls of all different types of rubber sheets in many different sizes and thicknesses. We can also cut gaskets according to our client's application

Rubber Matting

High-performance flooring range provides a special solution for each specific need:

- Fire resistance
- Dielectric strength or anti-static properties
- Resistance to oil or hydrocarbons
- Vibration Noise isolation etc.

www.kmmb.gr

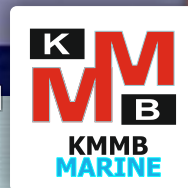

Rubber Tapes & Profiles

We offer:

- ⦿ A wide range of Solid or Sponge tapes from all types of Rubber. (sbr, silicone, epdm, viton, etc.)
- ⦿ Rubber profiles in all different shapes and sizes. (Designs: P, T, e, D, etc.)
- ⦿ We also offer Inflatable Seals which offer the easiest, safest and most effective way of sealing parts that move in relation to one another and need to be connected and disconnected.

In addition to our “on stock” range, we are eager to find solutions in any customized shape and size.

Hoses

We are the official distributor of Trelleborg Hoses and Rubber Expansion Joints in Greece. Trelleborg offers a wide range of hoses suitable for Marine Industry:

- ⦿ Oil, Petroleum and Gas applications (On shore, Offshore, Ship to Ship, Ship to Shore, Floating, Submarine, Cryogenic)
- ⦿ Chemical applications
- ⦿ Water and Steam applications

www.kmmb.gr

Rubber Expansion Joints

Expansion Joints offer solutions for pipe systems regarding thermal expansion, misalignments, vibrations and noise reduction.

Easy to install with good performance and long service life.

We also offer you the opportunity of designing and manufacturing a tailor-made full faced rubber flanges expansion joint to cover the most constraining applications

Thermal Insulation

Our thermal insulating material are made of Glass and Ceramic Fibers.

Products:

- Blankets
- Boards
- Coating & Mixes
- Packings, Braids & Ropes
- Papers & Felts

www.kmmb.gr

PVC Curtains

⦿ Food approved PVC Curtains isolate a space by preventing the entry of dust, insects, odors, etc. as well as the loss of cool/warm air while they allow the passage of vehicles and people

⦿ We can design and install the entire curtain meeting different requirements. Usual designs are installed with inox accessories.

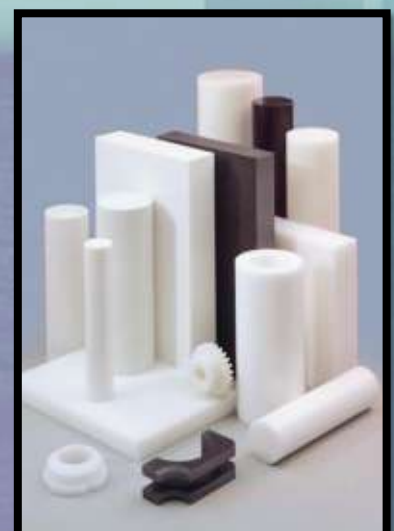

Engineering Plastics

We have always on stock a wide variety of Plastic Boards and Rods in different sizes.

Products:

- ⦿ Polyethylene (PE)
- ⦿ PTFE (Teflon)
- ⦿ Polyamide (PA)
- ⦿ Polyacetal (POM)
- ⦿ PVC
- ⦿ Acrylic (Plexiglas)
- ⦿ Polypropylene (PP)
- ⦿ PEEK

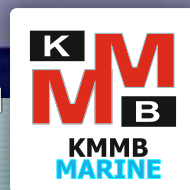

Commercial Fridge & Freezer Door

KMMB Company is supplier of commercial Fridge and Freezer door and Drawer Gaskets/Seals.

Our main aim at kmmb is to make the process of identifying, measuring and ordering Fridge and Freezer Door Gasket/Seals as simple as possible.

We have over 40 different Gaskets/Seals profiles, made specifically for fridge and freezers that we stock and can manufacture.

Insulating Jackets

Custom made INSULATING JACKETS

For any case we can offer the option of custom made jackets for the Thermal Insulation at particular parts of the ship or the factory.
